|----------------------|-----------------------------------|-----------|
| Computer Fundamental | <b>CLASSIFICATION OF COMPUTER</b> | 006       |

# CLASSIFICATION OF COMPUTER

## Based on Size

- Embedded computer
- Micro computer
- Mini Computer
- Mainframe computer
- Super computer

# CLASSIFICATION OF COMPUTER

## Embedded computer.

It is type of computing system which has some inbuilt pre programmed chip and perform some dedicated task.

# CLASSIFICATION OF COMPUTER

## Example of embedded computer.

- Calculator
- Video games
- Washing machine
- Music system
- Automatic car
- Etc.

# CLASSIFICATION OF COMPUTER

## Example of embedded computer.

- Calculator
- Video games
- Washing machine
- Music system
- Automatic car
- Etc.

# CLASSIFICATION OF COMPUTER

## Micro computer.

It is type of computing device which has microprocessor and perform multitask.

Example- laptop

Desktop

Notebook, smartphone tab etc.

# CLASSIFICATION OF COMPUTER

## Micro computer.

It is type of computing device which has microprocessor and perform multitask.

Example- laptop

Desktop

Notebook, smartphone tab etc.

# CLASSIFICATION OF COMPUTER

## Mini computer

It is type of computing device which has microprocessor and perform some professional multitask.

task like as graphics design business application administrative task etc.

It can also use multiprocessor

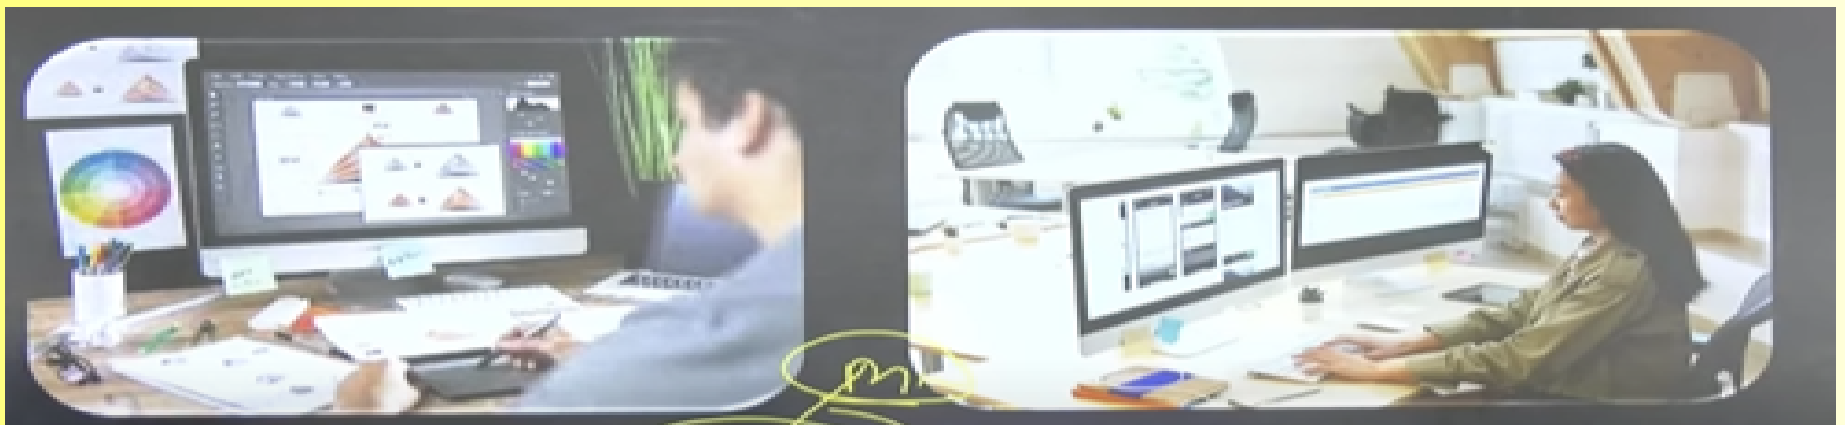

# CLASSIFICATION OF COMPUTER

## Mini computer

It is type of computing device which has microprocessor and perform some professional multitask.

task like as graphics design business application administrative task etc.

It can also use multiprocessor

# CLASSIFICATION OF COMPUTER

## **Mainframe computer.**

It is a type of computer which has highest storage capacity

Used in –

banking sector

Census

Aadhar data etc.

# CLASSIFICATION OF COMPUTER

## Mainframe computer.

It is a type of computer which has highest storage capacity

Used in –

banking sector

Census

Aadhar data etc.
